

I am totally opposed to any change that would reduce the effectiveness of the NJ do not call law. Prior to its implementation I was receiving 8 to 10 calls a day. The calls resulted in hang ups or automated messages. Since the implementation of the law I have only received one cold call. I find these calls unnecessary, unwanted, and of no value. I see no good reason why anyone should be given the right to call me to sell products to me without my request or interest. I would appreciate your support in not reducing the effectiveness of the NJ do not call law.
